

# At Work

## Training & Meeting Rooms

Using a projector at work is a great way to share ideas and get more productive. Whether you are buying a new projector or have an existing one and want to match a screen to the key thing to determine is:

- If you want the FLEXIBILITY of being able to move the projector screen around the office or even to your client's premises then you need a PORTABLE screen. Check out the PORTABLE products section of the 2C website, or refer to our ON THE ROAD BUYER'S GUIDE.

- If you are going to INSTALL your projector permanently in a meeting room or similar here are some things to consider.

Find out the native aspect ratio of your projector.

If you match your screen to this it will make alignment a lot easier. We recommend Motorised Roller Screens for installed business applications.

Product Code	Product Name	Mounting Space Required	Image Size	Aspect Ratio	Suits
2C504	Screen IT Motorised Roller	Can be ceiling or wall mounted	1800 x 1800mm	Multiformat 1:1	Any Projected Output
2C505	Screen IT Motorised Roller	Can be ceiling or wall mounted	2100 x 2100mm	Multiformat 1:1	Any Projected Output
2C506	Screen IT Motorised Roller	Can be ceiling or wall mounted	2030 x 1520mm 100" VF	4:3	Best suits Native 4:3 Projector
2C525	Screen IT Motorised Roller	Can be ceiling or wall mounted	2030 x 1270mm 94" 16:10	16:10	Best suits native 16:10 Projector

To install your projector you will also need a projector ceiling mount, use our helpful table below to choose:

Product Code	Product Name	Colour	Mounting Surface
2C101	Hang IT	Black	Low Ceiling
2C102	Hang IT	White	Low Ceiling
2C101   2C110	Hang IT   Extend IT	Black	Higher Ceilings
2C102   2C111	Hang IT   Extend IT	White	Higher Ceilings

To work out where to place your projector we recommend consulting either [www.projectorcentral.com](http://www.projectorcentral.com) or your projector manufacturer's website and looking at the throw distance calculator.
